

What are current Strengths/Weaknesses?

Facility weakness, educational results strength

Weakness lack of vertical integration, usage of data still a weakness, sense of community a strength, teachers committed a strength, strong leaders

Weakness – more connection to university, challenging students at high end, strength SPED and students with challenges

Strength – arts, leadership, athletics, courses

Communication

Weakness – one consistent place for information, strength community & support for schools; more engineering/technology

What are key changes in the context/environment?

PBE

State

Leadership turnover

How are we doing on “meet our students where they are at, and then move them forward”?

Not necessarily moving forward students at high pace

How are we doing on focusing on whole student?

By and large do it well

Some opportunities in health curriculum

Want information about what is happening at OHS (and OMS)? Also about vertical integration for social/emotional?

**How are we doing on creating a growth mindset?
Very hard to measure? What instruments for measurement could we use?**

Goals brainstorming

Facilities

Vertical integration (curriculum, scheduling, university, PBE, calendar, engineering/science)

Communication (technology wins?, content management, board communication, calendar)

Measurement of SGA goals (survey graduates, other instruments, alumni day/connections, continued growth of high achieving students)

Assessment and accountability around district/board goals

Fiscal sustainability

Alumni day, other connections

Stronger connection to university

More technology/engineering/science content

PBE

Making goals more effective/knowing what to do with them

Connection with communication to/from board

Develop a calendar for board
