

NON-RESIDENT STUDENT ENROLLMENT

In order to ensure that the non-resident students enrolled at RSU 26 can be appropriately educated by the staff and accommodated by the facilities and programs available, the school board will annually establish enrollment targets for incoming non-resident students. The superintendent will make a non-resident enrollment recommendation to the board by February and targets will be established by the board by March 1. If more students wish to register than can be accommodated, based on the enrollment target, the Superintendent shall recommend an equitable method for determining enrollment.

The same process described above will be used in establishing enrollment targets for non-resident students receiving special education services.
